

DENISE LARA

denisse2001.lara@gmail.com | github.com/DeniseLara | deniselara.onrender.com

PROFESSIONAL SUMMARY

Self-taught Frontend Developer with 1 year of hands-on experience building real-world personal projects. Focused on creating responsive, accessible, and high-performance interfaces using modern development practices and clean code principles.

Expanding into full-stack development with practical experience building REST APIs, implementing authentication, and integrating third-party services.

EXPERIENCE

CaloriePro – Full-Stack Health Tracking App

February 2024 - April 2024

- Developed React app with Firebase auth & real-time calorie tracking
- Implemented automated daily data resets via FastAPI backend & Google Cloud Scheduler
- Integrated Edamam API for food nutrition data | Deployed on Render

BuyNow | E-commerce Simulation Platform

May 2024 - July 2024

- Built full-stack e-commerce with Firebase auth, cart, wishlist & simulated checkout
- Implemented Stripe payment integration & real-time order tracking with Express backend
- 10-page responsive interface with public/private routes | Deployed on Render

Portfolio | Personal Developer Showcase

December 2023 - January 2024

- Built responsive portfolio with HTML, CSS & JavaScript showcasing projects & skills
- Implemented contact form with email validation & FormBold integration
- Deployed on Render with clean UI/UX design

Image Converter | Full-Stack Image Processing Tool

November 2024

- Built modern web app for image format conversion & optimization using NestJS & React
- Implemented secure processing with rate limiting & in-memory file handling

EDUCATION

Pontificia Universidad Católica de Valparaíso

2022 – 2023

Pedagogy in Biology Studies

ConquerBlocks Academy

2025 – 2026

Master in Full Stack Web Development

ADDITIONAL INFORMATION

- Languages: English B2
- Solid understanding of frontend architecture, performance optimization, and UX best practices.
- Backend experience with Node.js, Express.js, and NestJS, including JWT-based authentication and PostgreSQL.
- Knowledge of Hexagonal Architecture and design patterns such as SOLID principles, Atomic Design, Backend for Frontend (BFF), Microservices, and Microfrontends.
